providing a substrate according to claim 1 or claim 42 or produced according to claim 30 or claim 45; and

printing a toner image on the substrate.

42. (Amended) A substrate suitable for printing a toner image thereon, comprising:

a sheet of plastic;

an underlayer coating, on the sheet of plastic, comprising a first polymer material comprising a polymer chosen from the group consisting of amine terminated polyamide, amino propyl triethoxy silane and reaction products of amino propyl triethoxy silane; and

an overlay coating, directly on the underlayer, comprising a second polymer material and having an outer surface to which toner can be fused and fixed.
